VorTex S Line

SOLVENT / ECO-SOLVENT / UV/ LATEX

VorTex™ *Soft Signage Solutions by Ultraflex Systems, offers a variety of fabrics designed for optimal print performance with unparalled quality and design. The VorTex line is easy-to-use and application driven.*

*The **VorTex S line** is ideal for companies interested in expanding fabric offerings while using existing solvent, eco-solvent, UV and Latex printers. The S line is comprised of the industry's top selling fabrics including UltraPoplin PES S240 and UltraCanvas Artist S325*. The range of S line products includes knitted and woven fabrics with solutions for a range of front-lite, back-lit and blockout applications.*

MultiTex® S220
MultiTex S220 is a 6.5 oz. multi-purpose canvas made from 100% polyester spun yarn. The unique construction and coating make it an economical choice for fine art reproduction, indoor displays, wall murals and other art decor applications. MultiTex S220 may be stretched and framed Available in widths from 39"- 122".

TrueCanvas® Giclee 65/35
TureCanvas Giclee 65/35 is an 11 oz. canvas composed of a 65/35 cotton/polyester blend with an acrylic-gesso top coat. The gesso coating may be folded and stretched without cracking and provides a uniform low-glare finish. TrueCanvas Giclee 65/35 is free of heavy metals and designed to offer crisp detail and a rich tonal range. The material is available in a matte and gloss finish. It is ideal for fine art reproduction as well as various art decor applications. TrueCanvas Giclee 65/35 is compatible with solvent, eco-solvent, UV and Latex inks. Available in widths from 54" to 80".

UltraCanvas® Artist S325
UltraCanvas Artist S325 is a 9.6 oz., 100% woven polyester that has been bath coated in polyurethane. The material is coated again (on one-side only)with a digital coating. The unique coating process allows for a dual print surface using matte or gloss finishes. UltraCanvas Artist S325 may be used for indoor and outdoor applications. Available in widths from 54" to 198".

UltraCanvas® Heavy S285
UltraCanvas® Heavy S285 is an 8.5 oz., woven 100% polyester material that has been bath coated with our Universal coating. The coating allows the material to be printable using solvent, eco-solvent, UV and Latex inks. The heavy canvas construction makes it ideal for many indoor and short-term outdoor applications. Available in widths from 98" to 198".

UltraCanvas® Economy S205
UltraCanvas Economy S205 is a 6 oz., 100% polyester material that has been bath coated with our Universal coating. The coating allows the material to be printable using solvent, eco-solvent, UV and Latex inks. The heavy construction makes it ideal for many indoor and short-term outdoor applications. Available in widths from 98" to 198".

UltraCanvas® Light S190
UltraCanvas Light S190 is a 5.9 oz., 100% polyester woven material that has been bath coated in our Universal coating. The light canvas construction makes it ideal for back-lit or front-lit graphics used for indoor and short-term outdoor applications. The material provides good bleed through making it ideal for two-way graphics. UltraCanvas Light S190 has water repellent properties making it a great material for short-term event structures and pop-up tents. Available in widths from 80" to 198".

UltraCotton® S370
UltraCotton S370 is an 11 oz., 100% woven cotton with a water-based coating. The heavy canvas-like texture and crease-free characteristics make it ideal for art reprographics, theatrical backdrops and trade show events. The natural cotton material is recyclable and biodegradable. It is recommended for indoor use only. Available in widths from 80" to 198".

UltraFlag® PES S110
UltraFlag PES S110 is a 3.4 oz. knitted polyester material. The transparent material is ideal for flags, indoor applications and short-term outdoor hanging banners. It has good bleed through which allows for color brilliance. Available in widths from 122" to 198".

UltraPoplin® PES S240
UltraPoplin PES S240 is a 7.1 oz., 100% knitted polyester that is bath coated with out Universal coating. The coating technique allows for printing with solvent, eco-solvent, UV and Latex inks. The poplin is able to be stretched, making it ideal for expanding over frame systems and structures. UltraPoplin PES S240 is crease and wrinkle resistant and is ideal for use with trade show graphics. Available in widths from 54" to 198".

UltraTex® Blockout S335
UltraTex Blockout S335 is a 9.8 oz. textile. The material is composed of 70% polyester and 30% cotton. The product has a polyester finish on one side and a foam finish on the other with a blockout liner in the middle. The unique construction allows for a dual print surface. The fabric may be used for a wide range of indoor applications requiring a blockout effect. Available in 110" wide rolls.

* Formerly named UltraPoplin PES C240 and UltraCanvas Artist C325.
